

About Us

An idea was conceived in 2015 to provide quality internet services and to give the residents service and support along with transparency and power. We are based in Nagpur.

Thereafter, following these ideologies, the customer support center, client app, and chat options were created. Features like plan details, data usage, chat, online recharge and more were added to the app for the end consumer.

We aim to continually improve and add-on features for our customers.

Dedicated leased-line services are run for corporate houses with attention to their specific needs.

Our services are for diverse customers:

- Home Users
- Corporate Businesses
- Townships
- Hotels/Restaurants
- Industries
- Resorts
- And so on

Almost 3 years after the idea was formed, Netpret Solutions is on a growth stage to serve more and more areas and customers. The goal is to keep improving to provide best possible service with the latest technology.
